💻 Projects

Spoker

A first-person arena shooter video game I develop in my free time.

Website

My personal website where I started to write interactive articles. (The first one is in the making)

Hrtml

An Html templating language I intend to use in the near future to replace what i use for my personal website.

☒ Interests And Hobbies

Linux And Open Source

I'm using Linux on my laptop since four years ago. I used distributions such as Ubuntu, Archlinux et NixOs. I like to use open source softwares whenever it is possible.

Sciences, Research And Video Games

I have always been attracted to sciences, computer science in particular. I like to watch conferences and read articles on computer science as well as mathematics or physics. I also like video games and in the past few years enjoyed creating some. It has allowed me to apply my acquired knowledge in physics, mathematics and computer science.

Sport

I've been skateboarding for more than a decade. This sport, although individual, hold strong values of mutual aid and solidarity, while requiring perseverance and mental fortitude. I also played football, badminton, tennis, orienteering in clubs.

Music

I play basse guitar as well as percussions and guitar. I joined the jazz band and the fanfare orchestra of my village. I also participated in intensive music workshops during 4 summers.
